FOREWORD

The fiscal year ending June 1983 saw continuing evidence of a sustained upswing in student performance as test scores of all kinds continued to reflect higher student achievement. In SAT scores, in California Achievement Test scores, and in Maryland Functional Test results, the same pattern of achievement prevailed.

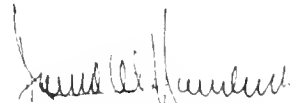

We must acknowledge that it is students who make better grades on tests, and students who are most to be congratulated at this turn of events. It is also true that teachers and supervisors, superintendents, and boards of education, all worked hard to help students achieve. I see these developments, too, as confirming the initiatives of the State Board of Education to produce better school systems in Maryland.

The narrative overview for 1983 consists of excerpts from the five-year summary, Serving Maryland Citizens Through Education, Public Libraries, and Vocational Rehabilitation, June 1984.

The statistical section is comprised of pertinent statistics on education in Maryland for fiscal year 1983 and is presented according to the following categories:

- o Background Data
- o Pupil Data
- o Staff Data
- o Adult Education Data
- o Vocational Rehabilitation Data
- o Financial Data
- o Maryland Public Library Data

It is our continued hope that this report will be useful both as a historical record and as a research and information guide to legislators, school board members, and other interested persons.

DAVID W. HORNBECK
State Superintendent of Schools

OVERVIEW:
1982 - 1983

17th
Annual Report

OVERVIEW

GENERAL INSTRUCTIONAL PROGRAM IMPROVEMENT

The Maryland State Department of Education (MSDE) has the statewide responsibility for setting instructional policy for Maryland's public elementary and secondary schools. The Department continually promotes excellence in the kindergarten through twelfth grades in curriculum, in program, and in instruction. MSDE has three basic roles in its instructional improvement: leadership, technical assistance, and regulation.

The Department's leadership in improving the quality of instruction in Maryland's public schools is well demonstrated through the programs and services initiated during the last five to seven years. Accomplishments include Project Basic, the Maryland Secondary Education Project, curricular frameworks, programs for the gifted and talented, programs and services for early identification and intervention, and the quality teaching program. In each initiative MSDE sets statewide standards, offers guidance on how the standards may be met, offers technical assistance whenever necessary, and monitors implementation throughout the state.

Project Basic implementation is nearing completion. Minimum requirements for high school graduation and the necessary instructions are fundamentally in place in Maryland. Student achievement is measurably improving.

The Department identifies statewide general curricular needs, plans and coordinates curriculum development and implementation activities, produces state curriculum guidelines, and provides technical assistance to LEAS. Since 1977, MSDE

initiatives in general curriculum development have focused on social studies, science, language arts, mathematics, foreign languages, physical education, and art. In each area statewide curricular frameworks have been or are being prepared, and statewide usage has been or is expected to be mandated by the State Board of Education.

MSDE has provided, substantial leadership in the development of programs for the state's gifted and talented students, resulting in a dramatic improvement in program quality and quantity. MSDE sponsors statewide summer programs and supports year-round local programs geared to providing challenging educational experiences that meet the unique needs of gifted and talented students. In the 1982-83 school year 44,779 gifted and talented students (6.8 percent of the total school population) attended special programs at all levels of schooling.

The case for early childhood education is indisputably strong. Early identification and intervention allows problems to be corrected before a child's development and learning are seriously, perhaps permanently, impaired. Early help can prevent other deleterious conditions from developing and can reduce the impact of adverse environmental factors, such as family upheavals, on the young child's development and learning process. Preschool education has not only proven educationally effective for disadvantaged, handicapped, and gifted children alike, it has been proven cost-effective. Early education benefits accrue not only to children but also to their families and the society at large.

Students and teachers need to develop the knowledge, skills, and attitudes for the effective use of computers in the teaching and learning process. A comprehensive computer education program should be provided for all students and should include computers as the focus of instruction as well as computers as instructional support.

INSTRUCTIONAL SUPPORT IMPROVEMENT

Significant MSDE effort and commitment is devoted to assisting local school systems provide instructional support services and program development. Responsibilities include school library media, instructional television, guidance and counseling, and pupil services, as well as efforts involving disruptive youth, parenting, and school volunteer programs.

MSDE provides leadership in the development of school library media programs, including student library research and media skills and the development of resources for library media centers in Maryland. The Department also provides support in the evaluation of instructional materials and in the use of technology in school library media programs.

MSDE's Division of Instructional Television (MITV) generates and disseminates many products and services. Since 1976, 42 separate video productions have been completed and aired on MITV. These included complete instructional series for student use, complete inservice packages for teachers, special "spots" on state instructional initiatives, and other special projects.

The Department helps in planning, developing, and coordinating a variety of pupil services to students in areas other than curricular and

extracurricular activities. Pupil services programs include guidance, school psychology, pupil personnel/social worker, and health.

Disruption in schools is a serious problem. Limited state funding has been available for planning, developing, and piloting a variety of programs for disruptive youth in grades 7-12 and potentially disruptive students, K-12. We now know a great deal about what works with disruptive students. We know how to reduce truancy, improve achievement, and reduce disruptive incidents. The challenge is for local education agencies (LEA) to secure the resources and to implement the program initiatives that are known to work.

IMPROVEMENT IN SCHOOL PERSONNEL

The quality of instruction in Maryland's public schools depends in the final analysis on the talent and training of the classroom teacher. While the great majority of the state's 40,000 teachers do a good job, there is room for improvement. That is, of course, true for school administrators and other school personnel as well. The Department works to improve the skills and performance of school personnel. It has overall responsibility for the credentialing of most public school personnel and for the approval of all teacher education programs in Maryland. It also provides leadership in staff development programs and services.

INSTRUCTIONAL INITIATIVES FOR STUDENTS WITH SPECIAL NEEDS

MSDE plays a key role in providing programs and services targeted to the needs of special populations in Maryland's public schools. These include compensatory, urban, and special programs for socioeconomically disadvantaged and migrant

children and special education programs for mentally, physically, and emotionally handicapped students.

MSDE efforts seek to help create programs to meet the unique needs of educationally disadvantaged children in Maryland. Children with special educational needs can learn like other children provided they have access to well planned, effectively implemented programs of instruction. Maryland programs aim for one year of growth for one year of instruction. While this goal is not always reached, MSDE places an emphasis on high standards and high expectations as necessary prerequisites of student achievement.

Ongoing relationships among parent groups, LEA's, state-accredited nonpublic schools for the handicapped, and MSDE provide a system of active cooperation to provide needed services to handicapped children. During the 1982-83 school year, 938 children received their special education programs in state accredited non-public schools funded through local and state agency contributions.

VOCATIONAL EDUCATION AND THE WORLD OF WORK

State education bylaws mandate that "Each local education agency shall provide to students at some time while they are enrolled in grades K-12, at a minimum, instruction in the World of Work in accordance with the Declared Competencies Index....." Opportunities must be provided, as part of the instructional program, for students to:

1. Develop and update an individual career plan for at least two consecutive years.
2. Participate in job interview simulations.

3. Complete a qualifications brief or a resume acceptable for employment.

The world of work component of Project Basic has been in place since 1980-81. In addition, vocational and career education opportunities have been greatly expanded so that all Maryland high school students now have access to them.

MSDE plays a significant role in standard setting, program planning and development, and providing technical assistance for vocational-technical education. Programs in Maryland today are varied, sophisticated in instructional methods, and available to virtually all segments of the state's population: secondary and postsecondary students, the unemployed, high school dropouts, displaced homemakers, students with limited English proficiency, those needing retraining, the handicapped, the disadvantaged, and incarcerated persons.

EQUITY

The Department is committed to equity in programs as well as personnel. The Department's Office of Equal Opportunity helps coordinate MSDE efforts in promoting equal educational and employment opportunity in Maryland's public school system. The MSDE point of view is that every staff member should view every decision through the equity lens.

MSDE provides direct assistance in race, gender, national origin, and disability awareness to local school systems. Since the program was introduced in 1980, awareness among administrative and supervisory staff has increased, and equity has become a consideration in planning and overall program emphasis in a majority of the LEA's.

Ongoing MSDE assistance has been provided to 22 of the 24 LEA's. Equity committees have been established to provide planning and models for self-assistance, and a cadre of administrators and supervisors have been trained in some of the LEA's to become trainers in all areas of equity.

ADULT EDUCATION

According to the 1980 census over 939,000 Marylanders 18 years or older did not have a high school diploma; nearly 1 in 3 adults. MSDE efforts have been directed towards increasing literacy and functional skills of adults, helping them acquire a high school diploma, and more generally securing support services to meet their personal and career goals.

In 1983, after the adoption of a bylaw on Adult General Education, MSDE began focusing funds on the support of prevocational skills development programs, parenting programs, GED instructional programs, and some broad-based avocational programs.

CORRECTIONS EDUCATION

MSDE's major responsibility in correctional education is administration of the academic programs leading to eighth grade certificates and the Maryland High School Diploma. Between 275 and 300 students completed high school annually prior to 1979. The numbers have increased markedly since then, with 549 students receiving diplomas in FY 83. Before 1979, 200 to 300 eighth grade certificates were issued annually; in FY 83, that figure was 573.

PUBLIC SCHOOL FACILITIES

Full state funding for school construction beginning in 1971 has propelled Maryland into the number one state in modern school facilities.

By enabling school districts to renovate and modernize existing school buildings which were physically as well as educationally obsolete, the Public School Construction Program has moved toward equalizing the quality of educational facilities and thus programs in Maryland. PSCP-funded facilities should be able to meet or adapt to the projected educational needs for decades ahead.

PUBLIC LIBRARIES

The State Board of Education is also the State Board of Public Libraries. MSDE has played a vital role in the direction, coordination, and supervision of the State Library Network. In 1983, the network received 224,453 interlibrary loan requests and filled 82 percent.

Marked improvements have been made at the Library for the Blind and Physically Handicapped (LBPH). Since 1976, registered users at LBPH have grown from 4,524 to 6,212. LBPH collections have grown from less than 70,000 items in 1976 to 137,000 items in 1983. In addition, LBPH sets up and maintains deposit collections in hospitals, nursing homes, special schools, and related institutions. Where there were only 362 deposit collections in 1976, a total of 555 had been established and were in service at the end of June 1983.

MSDE has also provided the leadership and helped expand the range of services available to

citizens with special needs. Most hearing impaired residents of Maryland now have access to their public libraries through a TTD (teletype). No one in Maryland had such access in 1975.

MSDE provides leadership in the development of public libraries in the state. With cooperation among MSDE and local libraries, the total circulation increased 31 percent, from 26.2 million in 1976 to 34.4 million in 1983. Improvements have also been made in planning, materials selection, and provision of community information.

VOCATIONAL REHABILITATION

Substantial resources of MSDE are directed toward vocational rehabilitation services which are provided through six regional offices.

MSDE has taken an active role in involving consumers and client advocates in the development and promotion of a sound vocational rehabilitation program in the state. Six regional advisory committees and the Maryland Rehabilitation Center Advisory Committee provide advise to MSDE in program planning, evaluation, and policy review. The regional committees focus on analyzing the volume and types of services which might otherwise be overlooked and encouraging the community to create new services wherever needed. In addition, advisory committee members are engaged in public relations activities with employers and the community at large to promote employment of the handicapped.

Between 1981 and 1983, the Disability Determination Services (DDS) conducted 10,418 periodic reviews of allowed disability claims. These reviews were mandated by the 1980 Social

Security Disability Amendments and were completed to determine eligibility for continuation of social security disability benefits. The reviews resulted in a 38.8 percent benefit termination rate and caused hardship and anxiety to thousands of disabled citizens of Maryland.

In October 1983, the State Superintendent of Schools instructed the Maryland DDS to discontinued terminating benefits for persons currently on disability rolls pending a resolution of policy questions affecting eligibility for benefits. During 1983, the DDS completed 55,286 claims and referred 3,787 persons to the Division. Benefits to disabled citizens of Maryland exceeded \$250,000,000.

MSDE's Maryland Rehabilitation Center, one of only nine such centers in the United States, continues to be a vital and unique resource for the severely disabled citizens of the state. Despite a significant reduction in staff and funds, there have been notable and important achievements in services to the disabled, including new services and equipment and specialized rehabilitation interventions as well as curriculum refinements.

ADMINISTRATION

Three phenomena often impede good results in large institutions like MSDE. First, desired objectives are not identified in measurable terms against time lines. Second, responsibility is not clearly defined. Third, areas of the organization operate independently of one another. In early 1977, MSDE began a process of administrative reorganization and consolidation undergirded by a rational management-by-objectives (MBO) system for identifying objectives, tasks, and timetables.

MSDE planning and evaluation procedures help each division/office annually adopt or reaffirm its long-term purposes, agree on short-term objectives and standards of performance, select and schedule activities, and record progress toward achievement.

The newly reorganized Office of Management Information Systems (OMIS) seeks to ensure that all MSDE data collection processing and dissemination activities will provide meaningful, accessible, and reliable information in the least burdensome manner to all users.

Major improvements in budgets, accounting, and auditing center around automation and more effective operational procedures. The accounting and budget function is now fully automated. There are improved controls over the receipt of cash from implementation of new invoice and receipt log procedures. Accurate and timely information concerning appropriations and expenditures is transmitted monthly to all MSDE divisions and offices. The automated system also allows MSDE to report to the Comptroller's Office using magnetic tape which interfaces with the state's Statewide Accounting and Reporting System (STARS).

CONCLUSION

All that is presented above is history. And yet, the nature of education assures that what has gone before determines the future. Maryland children are measurably reading, writing, and computing with more skill. No longer can it be said that young people can graduate from a Maryland high school without these basic skills.

Handicapped children, disadvantaged children, youngsters whose first language is other than English, gifted and talented students are all

being served in unprecedented numbers in quality programs yielding productive results.

The schools' curriculum from kindergarten through the twelfth grade has never been better. It is systematic and comprehensive. For the first time in at least two decades, emphasis is given to a core of learnings in English, social studies, science, and math. Students are challenged with high standards. The higher expectations are producing commensurate results in student performance.

Unprecedented percentages of graduates are going to college. At the same time equally unprecedented percentages of graduates have participated in vocational programs which give the student job-ready skills upon graduation.

Nevertheless, more remains to be done. Among the important areas which need to be addressed are the following:

1. Pre-ninth grade education--When the High School Commission is finished and its recommendations are moving toward implementation, we must turn our attention in a similarly systematic manner to pre-kindergarten through eighth grade programs.
2. International education--In a shrinking world, the cultural, political, language, and economic diversity of those who live beyond our borders must be better understood.
3. School media programs--The school media part of elementary and secondary education is too often ancillary rather than integral to the core school program.

4. Transition from school to work for handicapped young people--Ironically, this area has become increasingly important due, in large measure, to the success of elementary/secondary school programs. There is relatively little available and awaiting the 21-year-old handicapped young person.
5. Pupil services--With the guidance and counseling component of this area well along, a host of other pupil support services call for attention. These include psychological services, continued attention to programs for disruptive youth, attention to truancy and drop-out problems, and help in improving the relationship between home and school.
6. Computer-assisted instruction--With care, we must bring the power of computing to Maryland's student population. Computer illiteracy will, within a few years, be a thing of the past. It is the power of the computer as a tool to support learning and thinking which must be effectively and intelligently harnessed.

7. Critical thinking--Based on the accomplishments at the basic skill level and the impending vigor called for by the proposed graduation requirements, we face the challenge of high order thinking skills. We must define those skills and focus on how we equip teachers to provide learning opportunities which require the skills of analysis.

Finally, it must be said that resources must be obtained and appropriately distributed. At the moment the resources are neither sufficient nor equitably distributed. If excellence is to be achieved, it must be achieved for all Maryland's children. One major part of the resources issue is the ability of school systems to pay its teachers well enough to maintain quality. As we look to the retirement of several thousand of Maryland's teachers over the next five to six years, a substantial increase in the base salary will be required.

The history of public education in Maryland has been a successful and illustrious one. The time ahead is one of challenge and opportunity. The Maryland State Department of Education is prepared to meet the one and seize the other.
